(54) Title: ADAPTIVE PRE-WRITE FOR COLOUR SEQUENTIAL LCD DRIVING

(57) Abstract: This invention relates to a system (100) for adaptively driving a coloured liquid crystal display (102) displaying a sequence of images. The system (100) comprises driving electronics (106) for supplying a driving voltage for each pixel in the display (102), a frame memory (116) for storing a first image of the sequence of images, which first image is presently displayed on said display (102). In addition, the system (100) comprises a look-up table (110) for generating a pre-write signal (108) for the driving electronics (106) based on the first image in the frame memory (116) and a subsequent image to be displayed on the display (102).
